Fonctions

Cette caméra Daitem utilise l'intelligence artificielle d'un processeur dédié couplé à un algorithme d'apprentissage. Il se concentre, avec précision, sur les humains et les véhicules. Une détection peut également être effectuée ou confirmée par le microphone inclus dans la caméra.

SMD 4.0

La technologie Daitem Smart Motion Detection utilise des algorithmes intelligents pour classer les cibles qui déclenchent des détections. Elle filtre les détections, tels que les petits et grands animaux, afin d'éviter de déclencher de fausses alertes dans 99,5% des cas. Avec un Daitem SV325NX ou SV326NX, la fonction Quick Pick est disponible, elle vous permet de faire des recherches et de sélectionner facilement des cibles humaines et des véhicules, il vous sera alors proposé des vignettes de recherche avec les correspondances les plus fortes.

AI SSA

Daitem AI SSA permet un apprentissage par IA pour détecter les conditions de l'environnement et ajuster automatiquement les paramètres afin d'obtenir le meilleur résultat à l'écran.

Smart H.265+ & Smart H.264+

La technologie de codage intelligent Daitem permet d'obtenir la meilleure qualité vidéo avec un stockage optimisé et un niveau de transmission minimum.

Cyber Security

La technologie Daitem inclus des protocoles de contrôle d'accès, des communications cryptées incluant également le stockage des images et des vidéos. Ces technologies augmentent la capacité de nos caméras à se prémunir des attaques et des virus.
